

## **1. Project Objective**

To build a scalable and interactive astrology consultation platform that allows users to connect with astrologers via chat, audio, and video through a secure and seamless interface, featuring daily horoscopes, kundli creation, wallet, and secure payments. The platform will include:

- Public website
- Mobile apps (User + Astrologer)
- Admin Panel
- Secure backend (Node Js + MySQL)

## **Key Features**

### **2. User Types and Role-Based Permissions**

#### **1 Website (HTML/CSS/Bootstrap)**

- ◆ **Public Pages**
  - Home
  - About Us
  - Contact
  - Blog
  - FAQs
  - Horoscope Daily/Weekly/Monthly
  - Terms & Conditions, Privacy Policy

◆ **User Functionality**

- Register/Login (via email/OTP)
  - View astrologers
  - Filter by language, ratings, price/min
  - Book session (Chat/Call/Video)
  - Wallet Management
  - View History: Consultations, Payments
  - Leave Reviews & Ratings
  - Read Blog & Horoscope Content
- 

## **2. Admin Panel (Laravel + MySQL)**

◆ **Dashboard**

- Platform statistics (active users, astrologers, sessions, revenue)
- Live session tracker
- Notifications (platform alerts)

**Features with CRUD Functionality:**

- User Management: Create, View, Edit, Delete users, Block/Unblock user, View user wallet and session history
  - Astrologer Management: Approve/Reject astrologers, Edit astrologer profiles, Manage availability, Update pricing
  - Booking Management: View all bookings, Filter by date/status/type, Cancel or refund bookings
  - Wallet & Transaction Management: Credit/Debit funds, View transaction logs, Handle refund requests, Approve astrologer withdrawal requests
-

- Horoscope Content Management: Add, Edit, Delete daily/weekly/monthly horoscopes by zodiac sign
- Blog Management: Add, Edit, Delete blog posts and categories
- Coupon Code Management: Create new coupons, Edit existing coupons, Track coupon usage
- Feedback and Review Moderation: View all user reviews, Approve/Reject or Delete reviews
- Reports and Analytics: Download consultation and revenue reports, View platform usage metrics
- Support Ticket Management: View and respond to queries from users and astrologers
- Notification Management: Send push/email notifications to users and astrologers

### **3. Mobile Application (Flutter)**

#### **A. User App:**

- User Registration/Login via Email/OTP/Social Media
  - View astrologer listing with filters (language, price, rating, availability)
  - Book consultation: Chat / Audio / Video
  - Wallet Top-Up using Razorpay
  - View Consultation History
  - In-app Chat Interface
  - Call & Video Call Interface (via Agora/Twilio)
  - Horoscope Page (Daily/Weekly/Monthly)
  - Order Kundli / Matchmaking Reports
  - Push Notifications for reminders and offers
  - Review and Rate Astrologer after session
- 
-

**B. Astrologer App:**

- Astrologer Login/Signup with verification
- Profile Setup with skills, bio, price/min, available timings
- View and manage booking requests
- Accept or Reject bookings
- Start chat/audio/video consultation
- Earnings Dashboard with total and daily income
- Request withdrawal from wallet
- View reviews and feedback
- Push notifications for bookings and messages

---

## **4. Third-Party Integrations**

Connects your platform with external services.

- Payment Gateways
  - Razorpay
- Analytics
  - Google Analytics, Facebook Pixel
- SMS & WhatsApp APIs

Thank You
